What is Graphic Design?

Graphic Design History

Professor John Battista De Santis

Video-Discussion - What is graphic design?

"How do you define graphic design?"

Graphic Design surrounds us: it is the signs we read, the products we buy, and the rooms we inhabit.

Graphic designers work towards the ultimate goal of visually communicating a message, whatever the project.

Utilizing a language of type and imagery, graphic designers make every aspect of our lives defined and beautiful.

The term "graphic design" was coined by William Addison Dwiggins

Graphic Design History

Professor John Battista De San

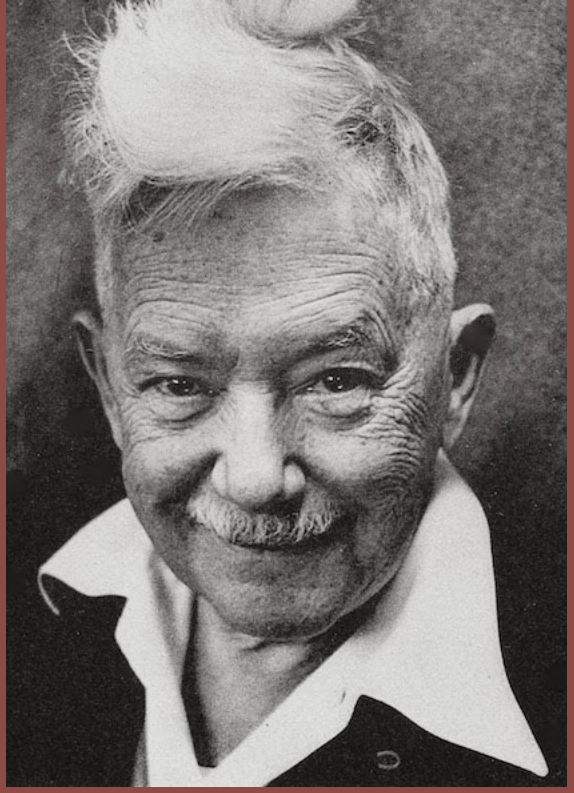
... in 1922

However, the origins of graphic design can be traced from the origins of human existence, from the caves of Lascaux, to Rome's Trajan's Column to the illuminated manuscripts of the Middle Ages, the first "branding campaigns" of Campari, to the neon lights of Ginza, Tokyo. The term did not achieve widespread usage until after the Second World War.

Graphic - Latin "graphicus of painting or drawing "
Greek graphikós able to draw or paint,
equivalent to gráph(ein) to draw, write carve (graffiti)

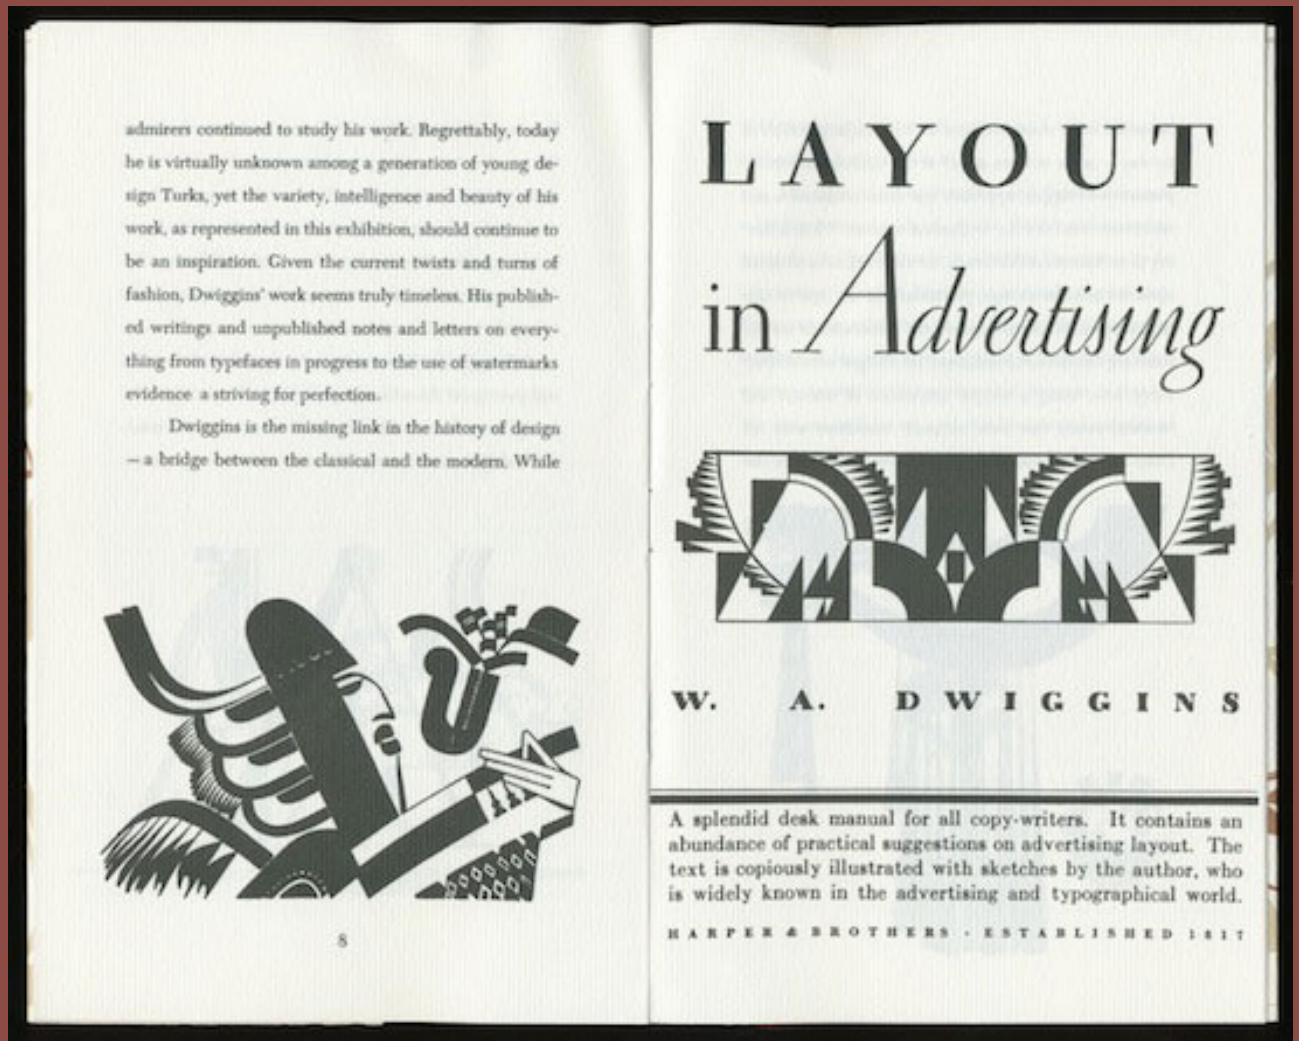
De - Latin dē-, prefix "of"

Sign - Latin signāre to "mark with" a sign, inscribe, affix a seal to,
Latin dēsignāre to mark out



William Addison Dwiggins, was an American type designer, calligrapher, and book designer.

Dwiggins was perhaps more responsible than any other designer for the marked improvement in book design in the 1920s and 1930s. He gained recognition as a calligrapher and wrote on the graphic arts, **his book Layout in Advertising (1928; rev. ed. 1949) remains standard.**



admirers continued to study his work. Regrettably, today he is virtually unknown among a generation of young design Turks, yet the variety, intelligence and beauty of his work, as represented in this exhibition, should continue to be an inspiration. Given the current twists and turns of fashion, Dwiggins' work seems truly timeless. His published writings and unpublished notes and letters on everything from typefaces in progress to the use of watermarks evidence a striving for perfection.

Dwiggins is the missing link in the history of design – a bridge between the classical and the modern. While

Design IN History

Graphic Design History

Professor John Battista De Santis

Giambattista Bodoni

After 200 years Bodoni's aesthetic sense serves as a guide to all typographers.

His fame became comparable to today's rock star.

Visitors flocked to his print works on the banks of a river Parma, to get see him working in his studio.
Benjamin Franklin, a printer himself, wrote a fan letter.

In 1805, emperor Napoleon & empress Josephine visited the city to see him.

"Depero futurista : 1913-1927 / Dinamo-Azar"

“a typographic racing car”

By Fortunato Depero, Italian Futurist artist/ designer 1892-1960

Known as “The Bolted Book” because of its binding using two aluminum industrial bolts

Libro imbullonato

Why the bolts?

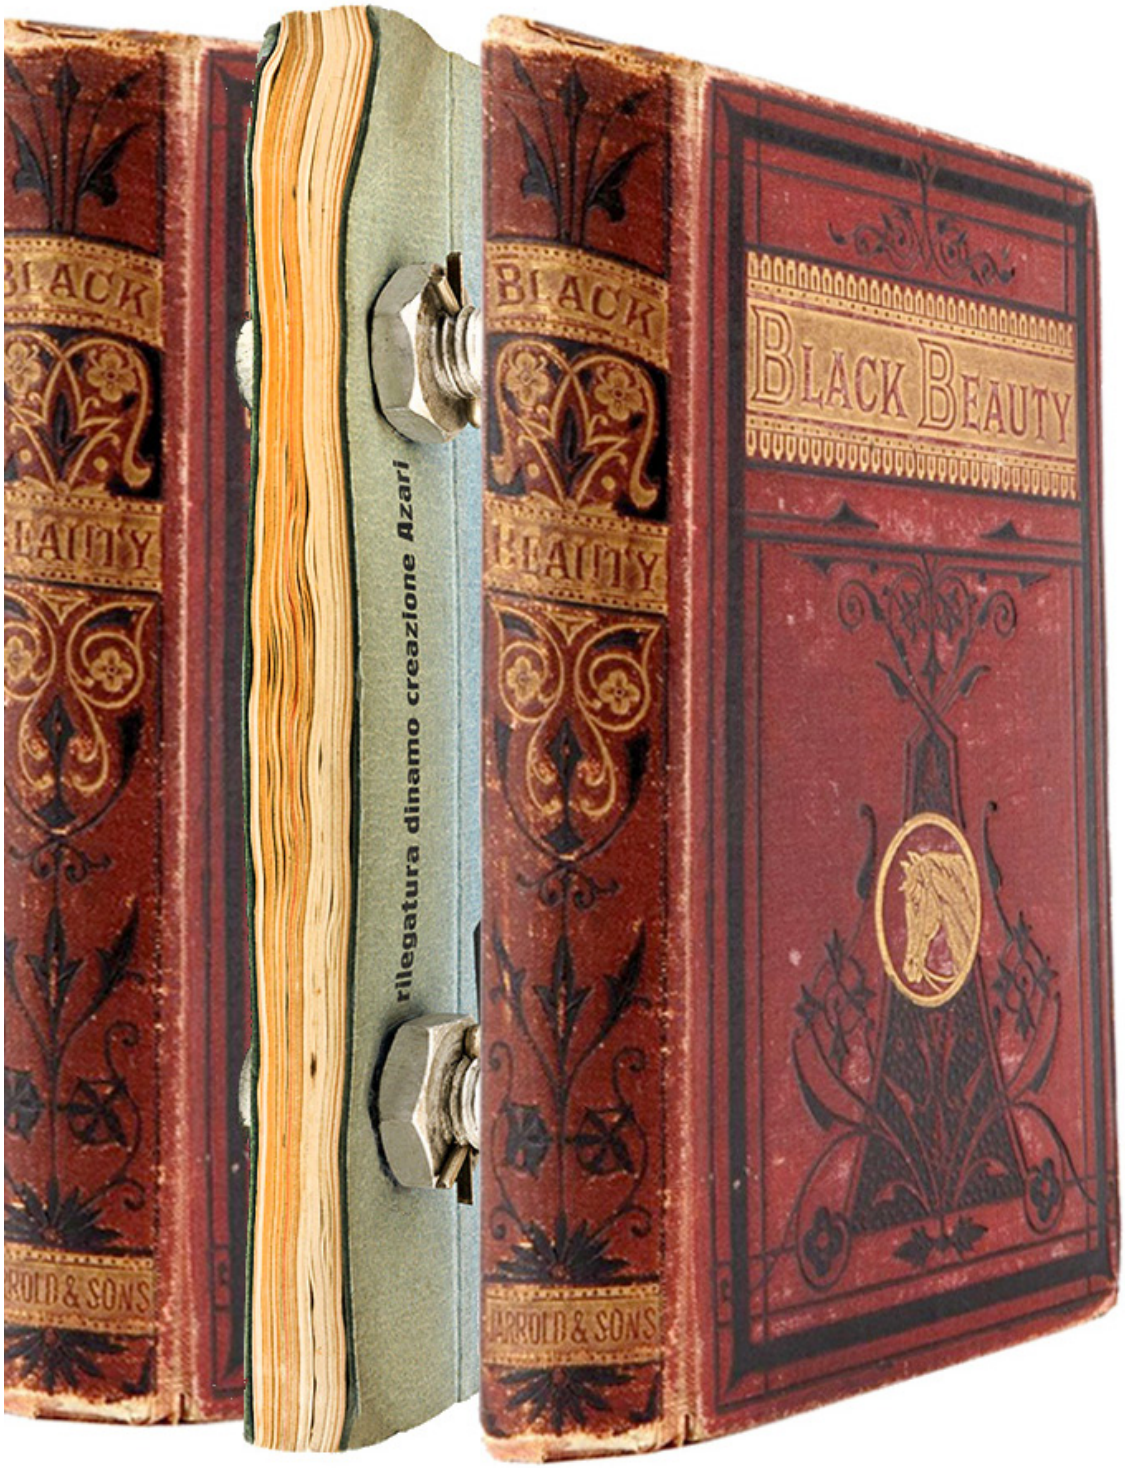
Why the bolts?

It would scar both books next to it if you slipped it onto a tightly packed bookshelf.

The bolts prevented the book from lying flat.

Symbolized the disruption of status quo,
the machine age,
the "future"

Futurism



Widely considered to be the first artist monograph.

240 pages, 146 with text or images, many of are purely typographic.

About 25-30 typefaces and 16 families

The book itself is an interesting and unusual design object.

The bolts that hold the book together at its spine can be opened, and the pages taken out

It was a also an entirely new type of publication that would go on to become a mainstay of the art world.

Depero was one of the first self-promotional artists–a concept that has exploded today with the rise of social media and the internet.

Printed around 1,000 copies, (25cmx32cm) for art collectors and potential clients. He even made four or five with metal covers for special clients.

Bolted Book Typefaces

Ray Tomlinson

Tomlinson created the world's first email system for the US government's Advanced Research Projects Agency Networks while working at the technology company Bolt Beranek and Newman.He utilized an existing but underused keyboard symbol

Germans, Poles and South Africans call it a monkey's tail, Chinese see a mouse and Italians and French see a snail.

Finnish call it the "meow" because it looks like a curled up cat.

Some scholars believe it dates back to the 6th C when scribes simplifies the Latin word ad (at) by exaggerating the upstroke of the letter d and curved it over the a. Some say 16th century Venetian trade used it as an abbreviation for amphora. Since the 19th century it has appeared on standard keyboards and computer keyboards to mean "At the rate of."

Projects
Assignments

Graphic Design History

Professor John Battista De Santis

Projects Assignments

Period of Design Review - Weekly Assignments.

Students will review Graphic Design Period of The Week and find four contemporary examples in the style of the weeks design period. Compare the contemporary work with period work then post to Canvas Site. Course Final students will create one multi page PDF

Purpose **Increase familiarity with characteristics of styles.**

See influences of historical design references in current graphic design/ advertising.

Period of Design Discussion - Weekly Assignments.

Students will review Graph in Canvas

Found Design Concept Book -Weekly Assignments.

Students will post examples of found real world graphic design and discuss on Canvas site. Semester end deliverable: a multi page PDF with images uploaded to Canvas site

Design Heros -

Student will research designers from the periods of Graphic Design history and submit short research and examples of their work. Then post to Canvas site.

Design Talk -

Student will review and critique graphic design work poste by instructor. Then post comments to Canvas site.

Morning at The Museum -

We will visit museum online collections, you will select 2-3 works related to the graphic design period of week and give your review of the work posted to Canvas site.

Optional activities

create your own camera obscura and post image

To make your own camera obscura try to get an image and post to site,

try one of these methods

Simple Box https://kids.nationalgeographic.com/explore/books/pinhole-camera/ (Links to an external site.)

Your Room https://petapixel.com/2014/05/12/diy-tutorial-convert-room-camera-obscura/

https://petapixel.com/2014/05/12/diy-tutorial-convert-room-camera-obscura/

Period of Design Discussion

Design Period of The Week Discussion

Hi Everyone,

My favorite image from this week's Industrial Revolution video was the Walter Crane Absurd ABC image. I like the image style which I think is similar to a woodcut, and also the bright colors on the black background.

Images for Children - Walter Crane

One of the earliest & influential designers of children's books

Cranes' books were solely for entertainment purposes he was the first artist who broke with a tradition of printed material for children & he remained active into the 20th century

Graphic Design Period of Week Usage Today

Period of Design Review

Contemporary applications of classic design styles.

Conveying the appropriate historical style of design helps communicate a specific attitude or mood. This project is a multi page PDF document with image collection of current samples of classic design styles, one per page

For the end of semester your will compile all your pages into final document

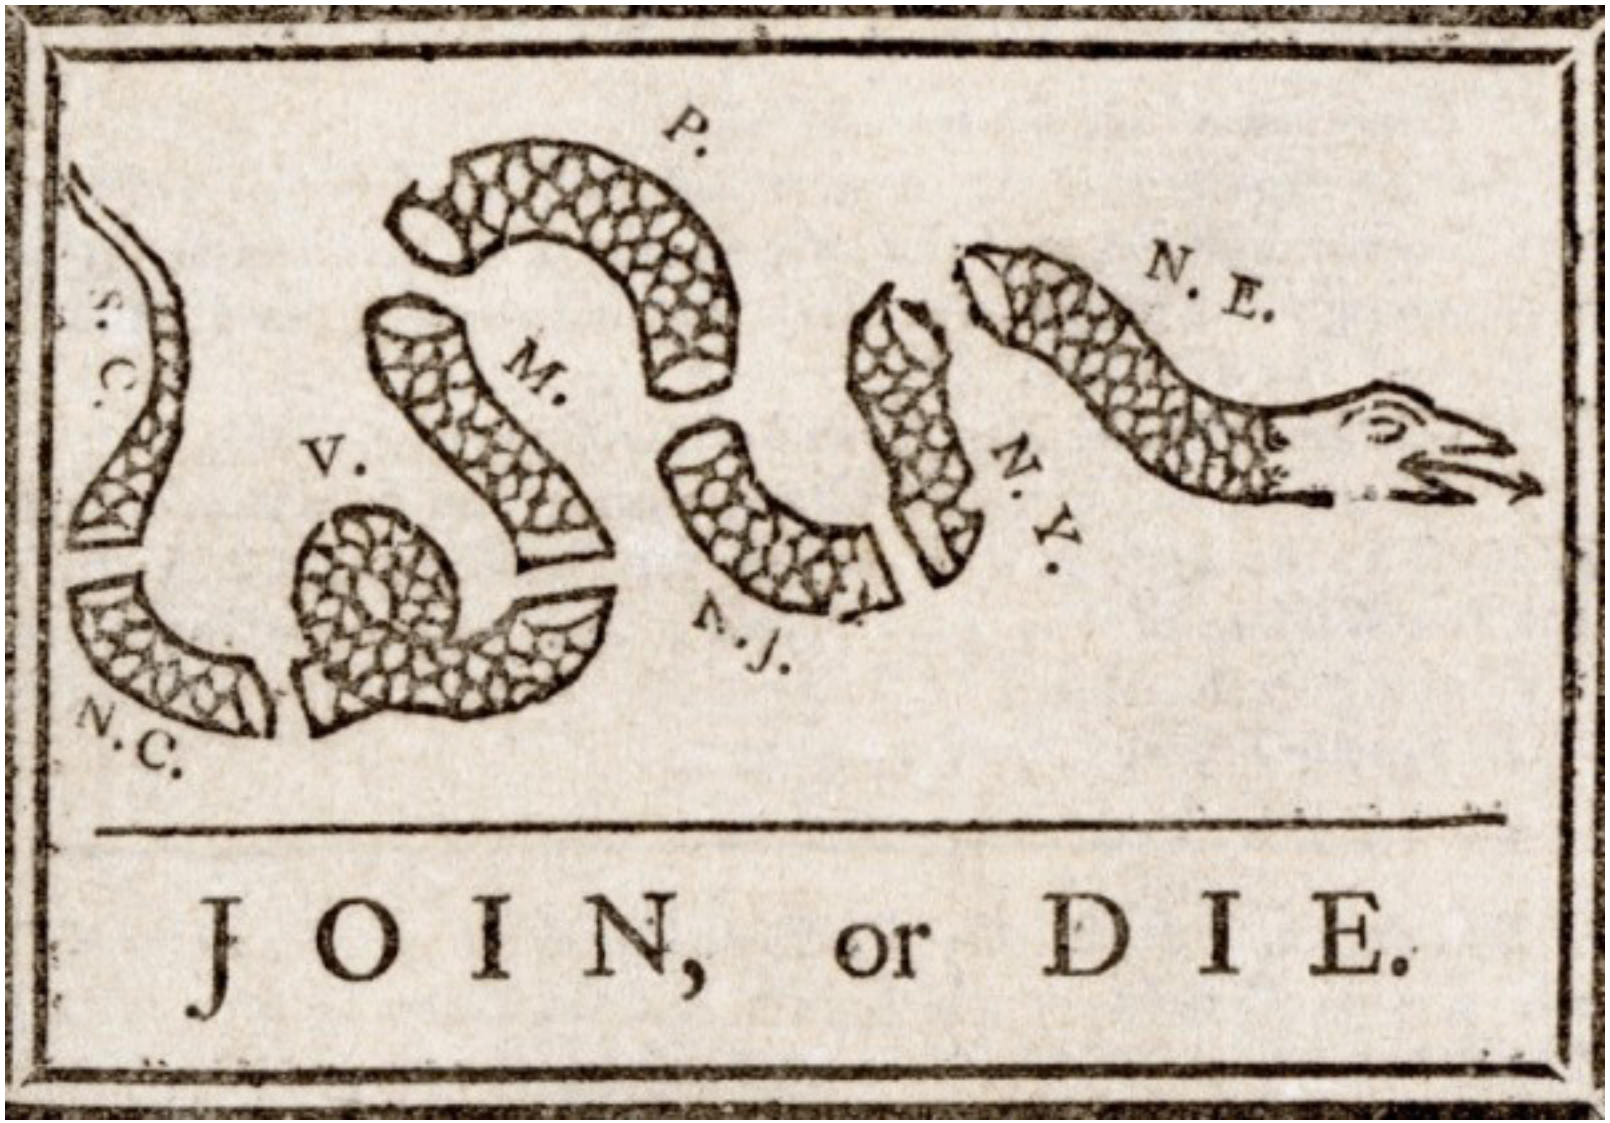
Design Heros

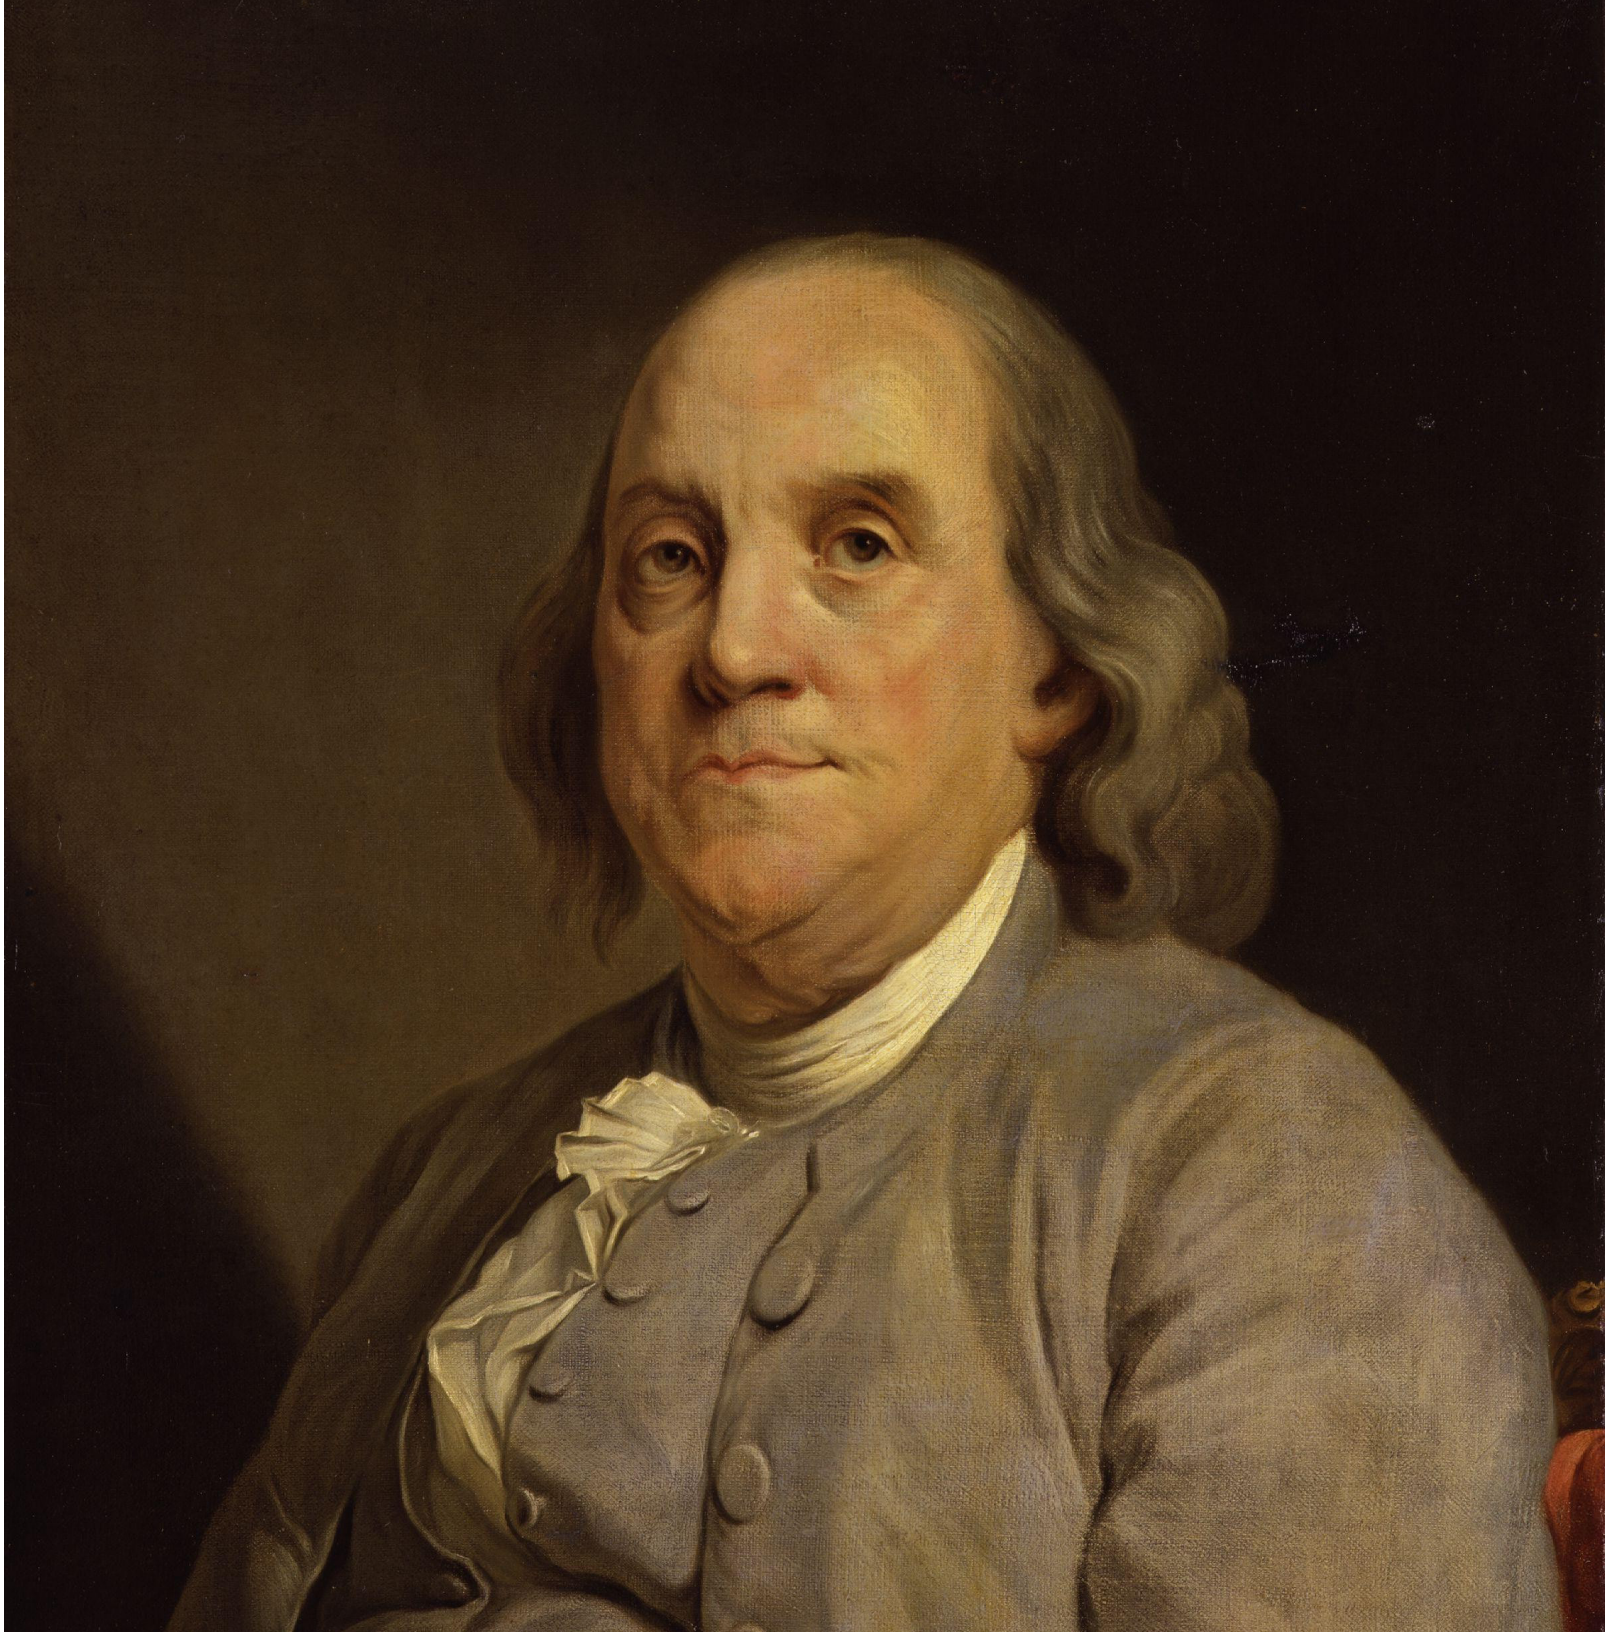
“If you can design one thing,
you can design everything.”
— Massimo Vignelli

“Most people who use Helvetica use it because it’s ubiquitous. It’s like going to McDonalds instead of thinking about food.
Because it’s there, it’s on every street corner.
So let’s eat crap, because it’s on the corner.
— Erik Spiekermann

The First "American" Graphic Designer?



P.
S. C.
M.
V.
N. J.
N. Y.
N. E.
N. C.
JOIN, or DIE.



Ben Franklin The First American Graphic Designer

Join, or Die the earliest known political cartoon in North America first published in 1752, Join, or Die continues to have an iconic status throughout the world.
The design remains a popular basis for many designs in sub and counter-cultures, from tattoos to skateboard decks.

Graphic design in the United States began with Benjamin Franklin who used his newspaper, The Pennsylvania Gazette, to master the art of publicity to promote his own books and to influence the masses.

Franklin added 14-point type for the first line of the advertisement; making "headlines"

Franklin added illustrations
Franklin was the first to utilize logos,
Franklin taught advertisers that the use of detail was important
in marketing their products. Some advertisements ran for 10-20 lines, including color, names, varieties, and sizes of the goods that were offered.[citation needed

Design Heros

Student Research designers from the Periods of Graphic Design History and submit short research and examples of their work. Then post to Canvas site.

Massimo Vignelli

Massimo was born in Milan in 1931, he came to America in 1957. His work covers nearly every field of design including advertising, identity, packaging, product, industrial, interior and architectural design. An avid fan of modernism, his work is always very clear and concise with no clutter or unnecessary material.

His first major foray into the field of identity and branding was through Unimark International, which quickly became one of the largest design studios in the world. He has designed identities for international corporations including American Airlines (which is the only airline to have not changed their identity in the past 50 years), Bloomingdales and Knoll. He favors a clarity in design and is a huge fan of using Helvetica, which can be seen in much of his work.

Massimo Vignelli

The Five Essential Typefaces

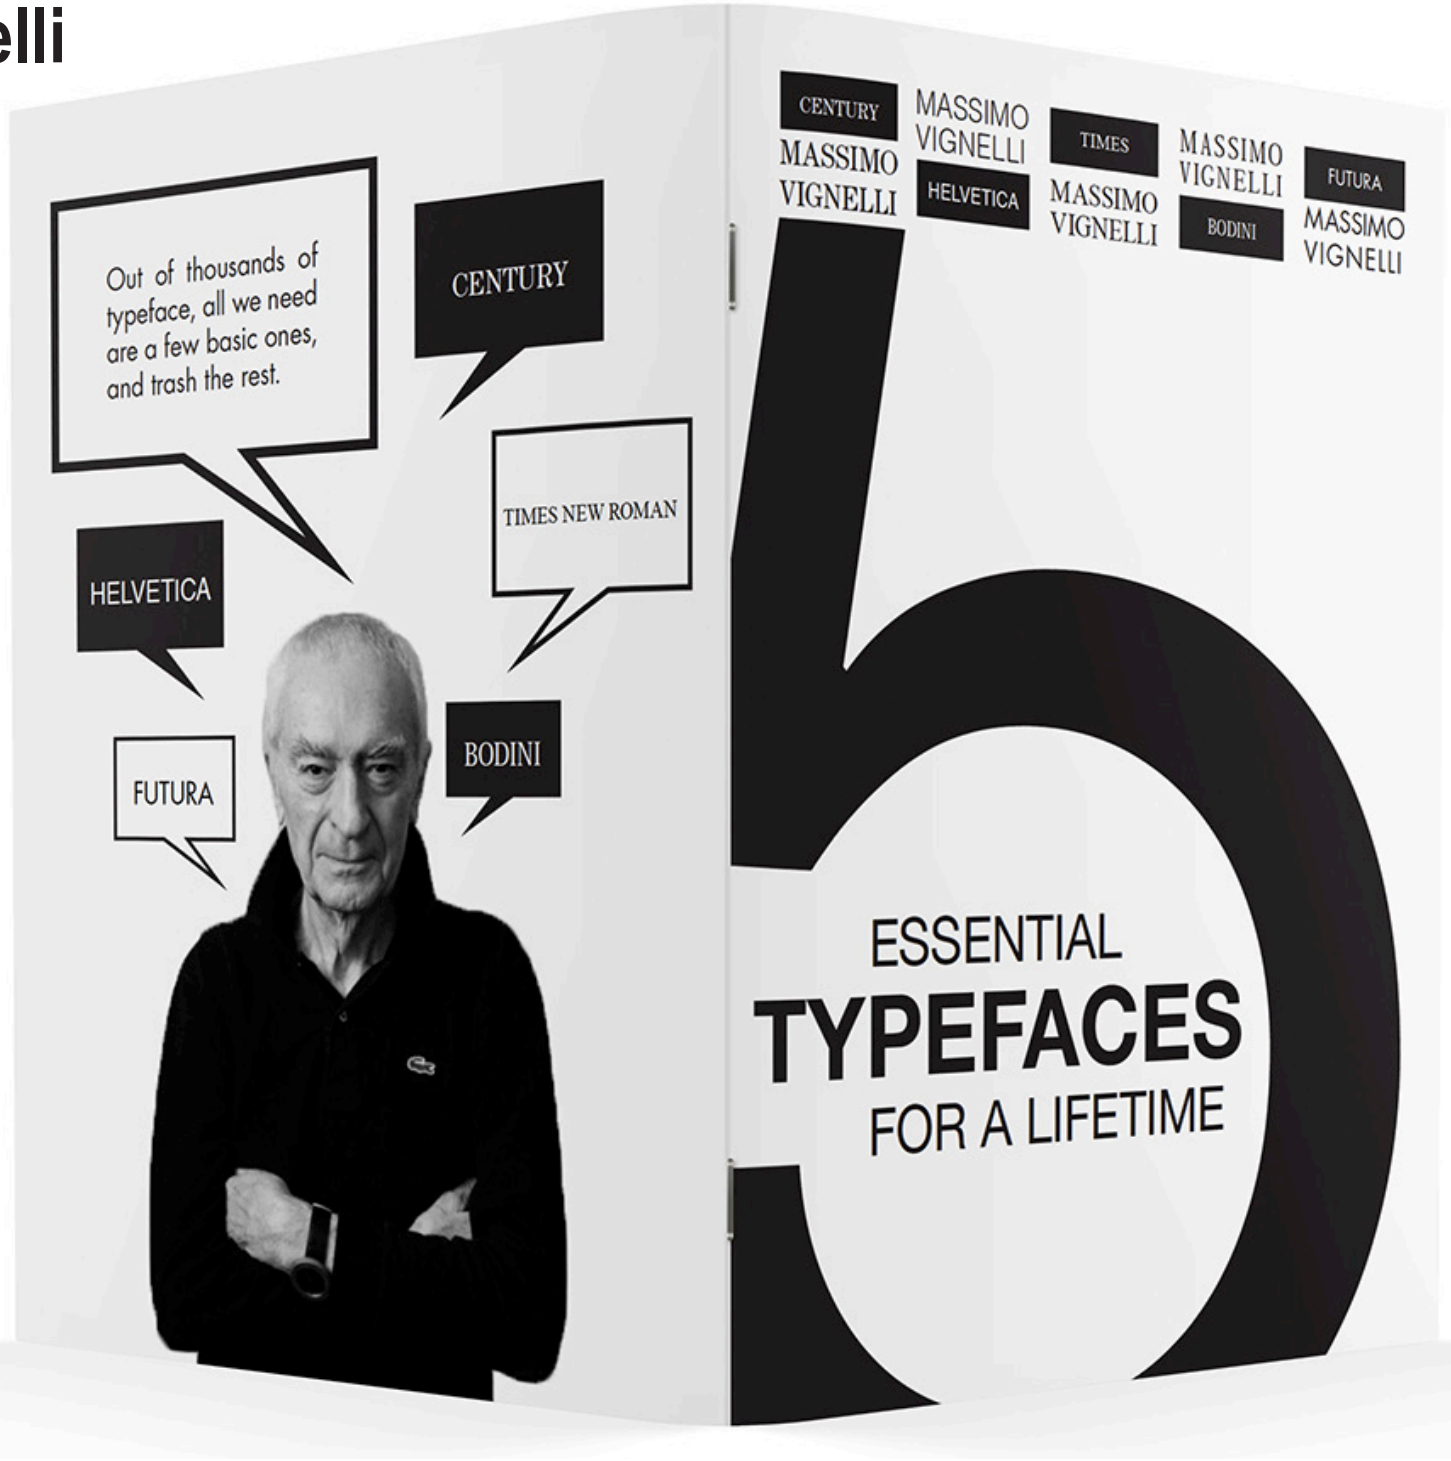
Bodoni

Helvetica

Times New Roman

Century

Futura



Lucian Bernhard is known for his involvement in the Plakatstil or "Poster Style" movement and the Sachplakat or "Object Poster" style. Both styles limited designs to a less detailed imagery and less type than that of other recent design movements, the Arts & Crafts or Art Nouveau.

Bernhard's designs had large areas of single, bright colors, and used a limited palette of colors within the compositions. The straightforward image and text design encouraged a specific focus on the represented objects and created clearer object references ideal for delivering effective advertising messages to viewers (consumers).

Born in 1883 in Stuttgart, Germany, Bernhard's given name was Emil Kahn, but he changed it. Bernhard designed typefaces as well as packaging, textiles, and trademarks during his career. "You see with your eyes, not your brain," he said in response to the idea of employing psychological theories in his intuitive method of design work.

He came to the United States in 1923, and he passed away in 1972 in New York.
